## Consumer Price Index, South Region-November 2014

### Prices in the South down 0.6 percent in November; up 1.3 percent over the year

The Consumer Price Index for All Urban Consumers (CPI-U) for the South declined 0.6 percent in November, the U.S. Bureau of Labor Statistics reported today. The energy index decreased 6.2 percent since October 2014, while the food index edged up 0.2 percent. The all items less food and energy index was unchanged in November, as price increases for shelter were largely offset by price decreases for apparel. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect the impact of seasonal influences.)

Over the last 12 months, the all items CPI-U rose 1.3 percent. The index for all items less food and energy advanced 1.9 percent over the year. (See [chart 1.](#))

**Chart 1. Over-the-year percent change in CPI-U, South region, November 2011–November 2014**

Percent change

Source: U.S. Bureau of Labor Statistics.

## Food

The food index edged up 0.2 percent in November led by an increase in prices for food away from home (0.4 percent). Prices for food at home were unchanged over the month.

Since November 2013, the food index advanced 3.1 percent, reflecting higher prices for both food at home (3.4 percent) and food away from home (2.6 percent).

## Energy

The energy index declined 6.2 percent over the month, led by price decreases in motor fuel and electricity, down 9.1 and 2.8 percent, respectively. Prices for utility (piped) gas service declined 0.7 percent in November.

Over the year, energy prices decreased 5.8 percent, reflecting an 11.9-percent decrease in motor fuel prices. Since November 2013, prices for electricity and utility (piped) gas service increased 2.5 and 1.6 percent, respectively.

## All items less food and energy

The all items less food and energy index was unchanged in November, as price increases for shelter (0.2 percent) were largely offset by a seasonal decline in apparel prices (-1.8 percent).

Since November 2013, the all items less food and energy index advanced 1.9 percent, led by price increases for shelter (3.4 percent) and medical care (2.2 percent).

**The December 2014 Consumer Price Index for the South region is scheduled to be released on Friday, January 16, 2015 at 8:30 a.m. (ET).**

## Technical Note

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 89 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers 28 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 87 urban areas across the country from about 4,000 housing units and approximately 26,000 retail establishments--department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at [www.bls.gov/cpi](http://www.bls.gov/cpi) and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at [www.bls.gov/opub/hom/homch17\\_a.htm](http://www.bls.gov/opub/hom/homch17_a.htm).

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. **NOTE: Area indexes do not measure differences in the level of prices between cities; they only measure the average change in prices for each area since the base period.**

The **South region** is comprised of Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

**Footnotes**

(1) This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

(2) Index is on a December 1982=100 base.

(3) Indexes on a December 1997=100 base.

(4) Special index based on a substantially smaller sample.

(5) Indexes on a December 1993=100 base.

- Data not available.

Regions defined as the four Census regions. South includes Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

NOTE: Index applies to a month as a whole, not to any specific date. Data not seasonally adjusted.
